

CONE SPADE & STABILIZERS

In recent years Dutchman's Nursery Equipment has spread to various markets within North America. Southern soils with "tap-rooted" trees have created a strong demand for coned spades. A redesigned coned spade (C-series) is now part of Dutchman's expansive equipment line and is produced in sizes of 33", 42", 48", and 54". These spades are built with the same renowned tower, frame, hinge, and blade durability that owners have come to expect. Designed for 30° baskets, the Dutchman Coned Spade will dig 100% of your nursery material for years to come.

Dutchman's coned spade meets competitors height and width specifications. However, unlike conventional spades that have a fixed width and height, the Dutchman's C-series can be further reduced simply by lowering the blades to create a more compact option.

STABILIZERS FOR ALL MODEL(S) SKID STEERS & LOADERS

All Stabilizers come complete with hook-up connections, hose kits, and are designed not to extend beyond the wheel-base of your skid-steer.
