

DUTCHMAN TREE PLANTER

Dutchman Planter is designed to plant 8000+ trees a day under ideal conditions. It has the ability to carry 1200+ WHIPS or 400 branched trees on its side platforms. It is also equipped with a front pivoting bar that allows for a change in depth of the plow shoe while keeping the backfilling and packing components the same, as you move over grades. The backfill blades and packing wheels can also be adjusted so that nursery stock will be securely planted using any plow shoe size. Built for quality tree setting and successful growth.

Replaceable cutting shears and front tooth helps to ensure that the plow shoe does not wear.
