

DUTCHMAN TREE SPADE

U.S. PATENT: #5,459,952
CDN PATENT: #2,146,703

In the early 1980's, *Dutchmaster Nurseries Ltd.* felt the need to build a better tree spade. By the early 1990s the new design was born, and made to withstand the abuse of high production digging. With the help of our operators, we feel we were able to produce the best spade on the market, that eliminated blade bending and produced a superior rootball. The Dutchman Spade can dig both a deep or a shallow rootball that accomodates the root system of all varieties of plants. All spades can be custom-made to meet your needs.

BUILT BY THOSE WHO USE THEM THE MOST!
