

MINI NURSERY JAWS®

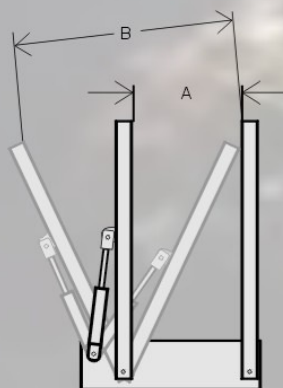

Small but mighty, the Mini Nursery Jaws® is the perfect addition to your walk-behind loader. With an 800 pound capacity the Mini Nursery Jaws® can handle your toughest jobs with ease. Like all the larger Nursery Jaws®, the Mini Nursery Jaws® can move B&B, containers, boxes, and rocks & boulders. Coupled with a walk-behind loader, the Mini Nursery Jaws® allows you to transport your landscaping material in tight places, through gates and down narrow isles. The Mini Nursery Jaws® will make your Mini loader mighty!

- Mini Nursery Jaws® handles up to 32" B&B, containers, & small rocks & boulders
- Lightweight & compact for use in tight spaces
- 30" or 42" forks available

Hydraulics	System relieves at 2000 psi 2-5 GPM adequate for speed of operation.
Largest Rootball capacity	32"

"After seeing the Mini Nursery Jaws® in action at a local wholesale nursery, I decided to get them for my Toro Dingo 322. They work the same on my compact utility loader as they do on a full size skid loader. Mini Nursery Jaws® allow me to handle with ease many of the B&B trees that come in and out of our nursery. They have the power to lift and hold anything the Dingo can handle. If you are currently moving and loading B&B material with forks, I highly recommend them."
